

Proper nutrition is the foundation for living your best life. Yet, malnutrition affects one in three people around the world and impacts people of all ages, all geographies and all socioeconomic classes.

Abbott is committed to reducing malnutrition globally. The Abbott Center for Malnutrition Solutions applies Abbott's science and expertise, in collaboration with others, to make good nutrition accessible to more people around the world. The work of the center also contributes to Abbott's 2030 Sustainability Plan ambition to transform care for malnutrition, chronic

#### **LEVERAGING SCIENCE AND INNOVATION**

Science and innovation are core to addressing malnutrition. Abbott has a long history of success in understanding the science behind nutrition and innovating to make nutrition accessible to people around the world. The center leverages its learnings from previous work, such as [Nourimanba](#) in Haiti, [Ultra Rice](#) in India, the [MUAC z-score tape](#) and the [Malnutrition Quality Improvement Initiative \(MQii\)](#), as examples to guide our ongoing work.
